Meet

**Prabhath Thanayamwatte**

to Usha

Hi Usha

I would want to see below things in your assignment

- Gamma calculations in each lag (in both directions)
- Determining number of pairs should be done as I sh you have to calculate this. so it's easy if you follow t
- The variograms are fine but you do not need to use appropriate equation. You can use excel curve fitting one, so start with that and try the common equatio instructions for excel curve fitting, please refer)
- Explained the assumptions and justify any decisions
- Link each cell when you do the calculations.
- Make the excel file little bit neat, go through the qu
- I did not ask to do the kriging here, but if you can it

Hope this would help you

Thank you

Prabhath
