CIS 320 Assignment

Lessons Learned / Self-Assessment

Prepare your own lessons learned report based on personal reflections of what you learned from this class, including the team projects and presentations. This report should be 1-2 pages, single-spaced.

Write a self-assessment based on the team project. This assessment should be 1-2 pages, single-spaced. Answer the following questions in your assessment:

- If you had to give your team a grade for this project, what would it be? Why?
- What were *your* roles and responsibilities on the group project? How well do you think *you* performed on this project?
- Briefly assess each team member's performance. If you had to give each person, including yourself, a grade, what would it be? To compare individual contributions, if you had 100 points to allocate among your team members, how would you allocate them?

Combine your lessons learned report and self-assessment in one Word document and submit it through RamCT. The assignment deadline will be posted in RamCT. You do not need to submit a hard copy.
